CONTENTS

Special Issue:
Molecular Spectroscopy and Molecular Structure 1989 — Proceedings of the XIXth European Congress on Molecular Spectroscopy, Dresden, G.D.R., 3–8 September 1989.

Part A: Plenary and Section Lectures

(This is the first of three Congress Volumes)

Committees vi
Preface vii
The history of the discovery of the spectra of CH_2 and H_3
G. Herzberg (Ottawa, Ont., Canada) xi
Excitation and measurement of some very fast molecular processes with femtosecond light pulses
M. Kaschke (Berlin, G.D.R.), W. Rudolph and B. Wilhelmi (Jena, G.D.R.) 1
Coherent Raman spectroscopy of excited electronic states of large molecules with picosecond time resolution
V.F. Kamalow, N.I. Koroteev, A.P. Shkurinov and B.N. Toleutaev (Moscow, U.S.S.R.) 19
Vibrational studies of structural phase transitions in partially ordered solids
A. Novak (Thiais, France) 35
Multiphoton ionization mass spectrometry: methods and applications
J. Grotemeyer, J. Lindner, C. Köster and E.W. Schlag (Garching, F.R.G.) 51
Application of photoacoustic spectroscopy in photosynthesis research
C.N. N'Soukpoé-Kossi and R.M. Leblanc (Trois-Rivières, Qué., Canada) 69
High resolution infrared spectra
K. Narahari Rao (Columbus, OH, U.S.A.), M.E. Mickelson (Granville, OH, U.S.A.) and J.T. Trauger (Pasadena, CA, U.S.A.) 85
Solution conformations of protein-binding DNA sequences: characterization by vibrational spectroscopy and energy minimization procedures
H. Fabian (Berlin, G.D.R.), W. Hoelzer (Erfurt, G.D.R.), G. Herrmann, O. Ristau, H. Sklenar and H. Welfle (Berlin, G.D.R.) 99
In-situ FTIR emission spectroscopy on chemical vapour deposition processes
V. Hopfe, D. Wagner, P. Klobes, S. Herzig and G. Marx (Karl-Marx-Stadt, G.D.R.) 115
Resonance Raman spectroscopy in organometallic chemistry. Characterization of electronic transitions and interpretation of photochemical data
D.J. Stufkens and A. Oskam (Amsterdam, The Netherlands) 131
Static and dynamic aspects of matrix isolated molecules: are molecules isolated in rare gas matrices really force free?
H.H. Guenthard, T.-K. Ha and R. Gunde (Zurich, Switzerland) 143
Time-resolved resonance Raman spectroscopy of 1,3,5-hexatrienes in the lowest excited triplet state. The potential energy surface in T_1
R. Wilbrandt (Roskilde, Denmark), F.W. Langkilde (Copenhagen, Denmark), A.M. Brouwer (Amsterdam, The Netherlands), F. Negri and G. Orlandi (Bologna, Italy) 151
Theory, applications and limitations of time resolved resonance coherent antistokes Raman scattering
A. Lau, M. Pfeiffer, W. Werncke and Kim Man Bok (Berlijn, G.D.R.) 161
Application of modern NMR techniques for conformational analysis and assignment of NMR parameters of biologically active compounds
S.L. Spassov, M.F. Simeonov, B.P. Mikhova and P.S. Denkova (Sofia, Bulgaria) 169

Theory, applications and limitations of time resolved resonance coherent antistokes Raman scattering
A. Lau, M. Pfeiffer, W. Werncke and Kim Man Bok (Berlijn, G.D.R.) 161
Application of modern NMR techniques for conformational analysis and assignment of NMR parameters of biologically active compounds
S.L. Spassov, M.F. Simeonov, B.P. Mikhova and P.S. Denkova (Sofia, Bulgaria) 169

Picosecond dynamics in amorphous systems with local order
W.G. Rothschild (Dearborn, MI, U.S.A.) 181
Colour and topology of conjugated systems
G.G. Dyadyusha, A.D. Kachkovsky and M.L. Dekhtyar (Kiev, U.S.S.R.) 195
NIR-FT-Raman spectroscopy, state of the art
B. Schrader, A. Hoffmann (Essen, F.R.G.), A. Simon (Karlsruhe, F.R.G.), R. Podschadlowski and M. Tischer (Essen, F.R.G.) 207
Structural determinations of the haloacetyl halides by experimental and computational methods
T.S. Little, A.Y. Wang and J.R. Durig (Columbia, SC, U.S.A.) 221
Influence of the nature of the hydrogen bond on the isotopic ratio ν_{AH}/ν_{AD}
Th. Zeegers-Huyskens (Heverlee, Belgium) 239
Raman study on surface layers and thin films by using total reflection experiments
W. Hölzer, D. Schröter and A. Richter (Erfurt, G.D.R.) 253
Spectroscopy of pentacoordinate silicon derivatives
Yu. L. Frolov and M.G. Voronkov (Irkutsk, U.S.S.R.) 265
Spectroscopic studies of van der Waals interactions
W.A.P. Luck (Marburg, F.R.G.) 281
Two and three dimensional structure search to solve spectroscopic problems in industry
B. Adler, S. Dobers and J. Will (Schkopau, G.D.R.) 297
The infrared spectrum of the hydroxylamine dimer
G.A. Yeo and T.A. Ford (Johannnesburg, South Africa) 307
Characterization of CrO_3–GAl_2O_3 catalysts by Raman spectroscopy
A. Oskam, D.J. Stufkens and M.A. Vuurman (Amsterdam, The Netherlands) 325
Structure–property relations in spectroscopy
H. Boegel (Merseburg, G.D.R.) 335
Infrared spectra of amorphous oxides
W.E. Steger, H. Landmesser, U. Boettcher and E. Schubert (Dresden, G.D.R.) 341
Applications of infrared spectroscopy to biology and medicine
H.H. Mantsch (Ottawa, Ont., Canada) and R.N. McElhaney (Edmonton, Alta., Canada) 347
Star formation seen with high resolution spectroscopy
G. Winnewisser (Cologne, F.R.G.) 363
